CS 4002 2022
Robots and Society
Participation Assignment #1

Due: January 25 at 9:30AM, Late assignments are not accepted.

Paper format is 1" margins, 12-point Times Roman font, single-spaced which equals ~500 words/page. This will be the standard for the remainder of the semester.

After you have read both of the papers for the Robot Deception section:
   1. “AI Deception: When Your Artificial Intelligence Learns to Lie”, Heather Roff
   2. “The Ethics of Robot Deception”, Ronald Arkin

For each paper, write one paragraph that states one point that you either agree with or disagree with the author in that paper, and provide a brief but coherent explanation why. In a few sentences.

The length should be about ½ page (250-300 words) but definitely not longer than one page.

Submit via Canvas.
