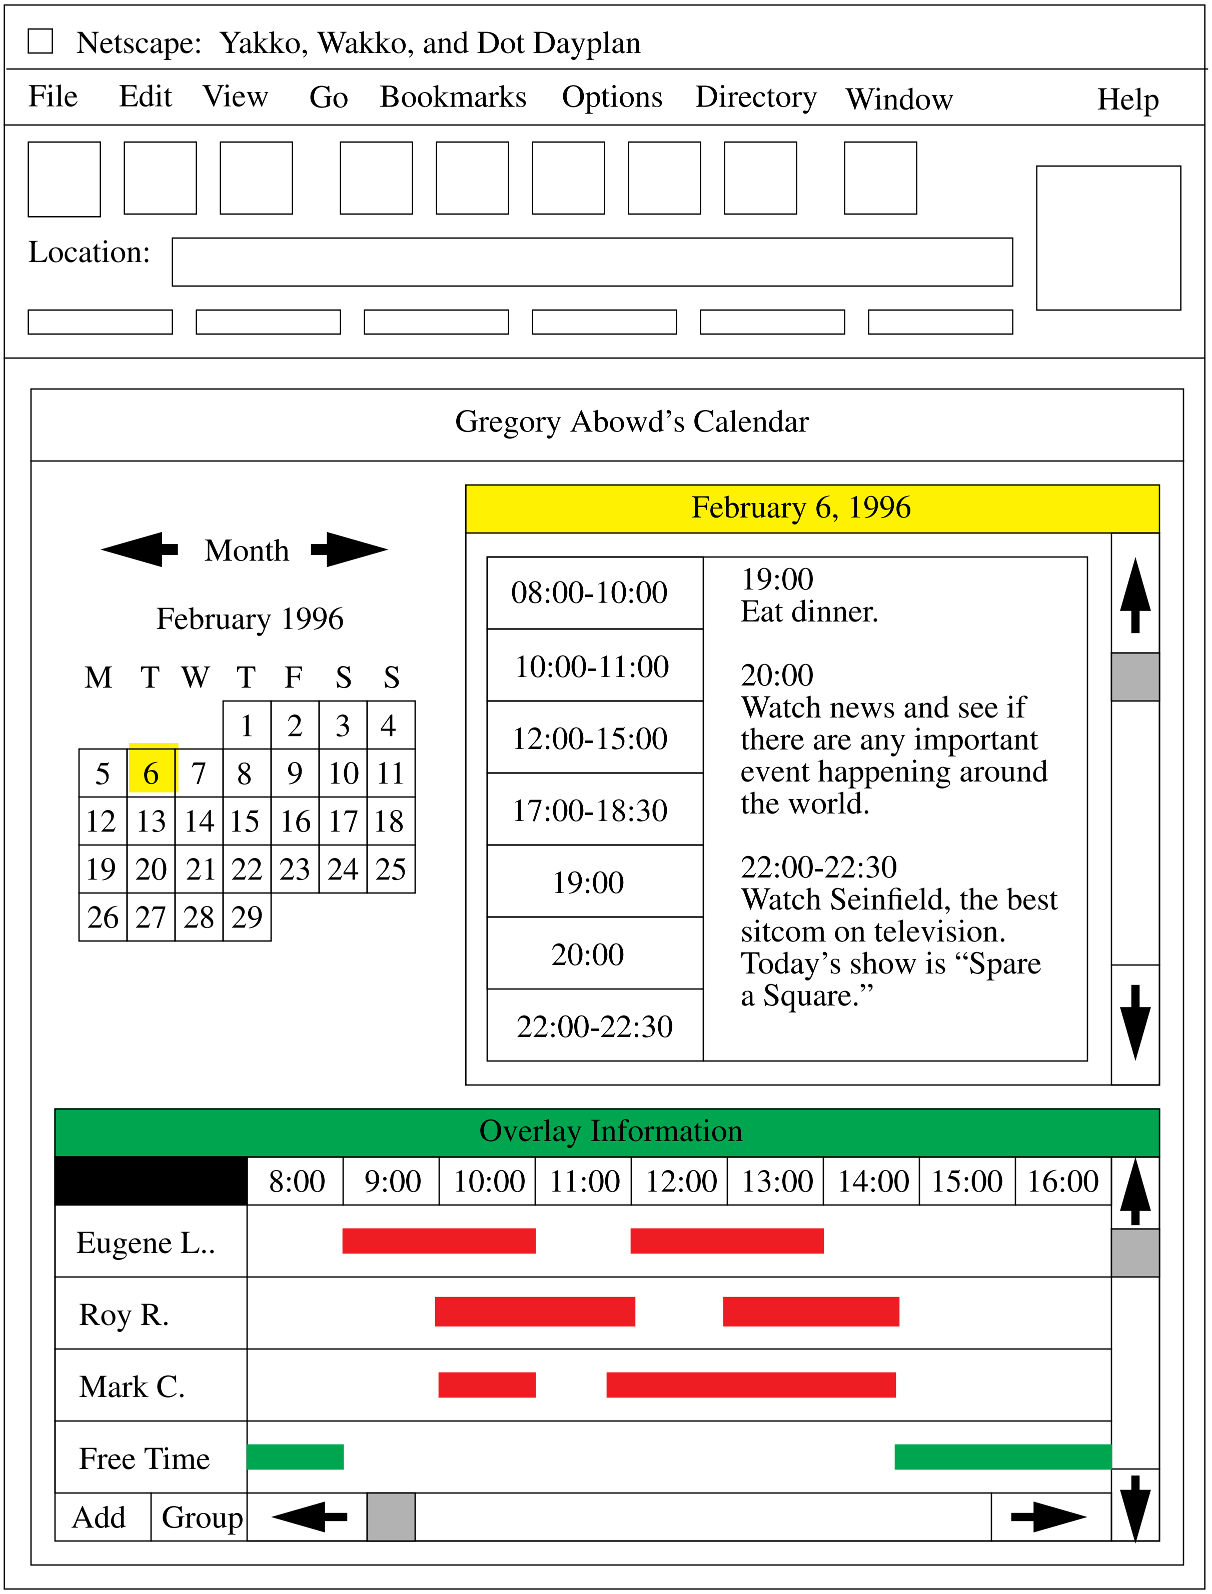
9) Once again, the Free Time section will automatically update to indicate the available block of time everyone is free. Note on the Group. In order to add new groups, the user needs to modify the file that stores the information about the group. This is a constraint that is placed on us because of the Netscape2.0 security system.

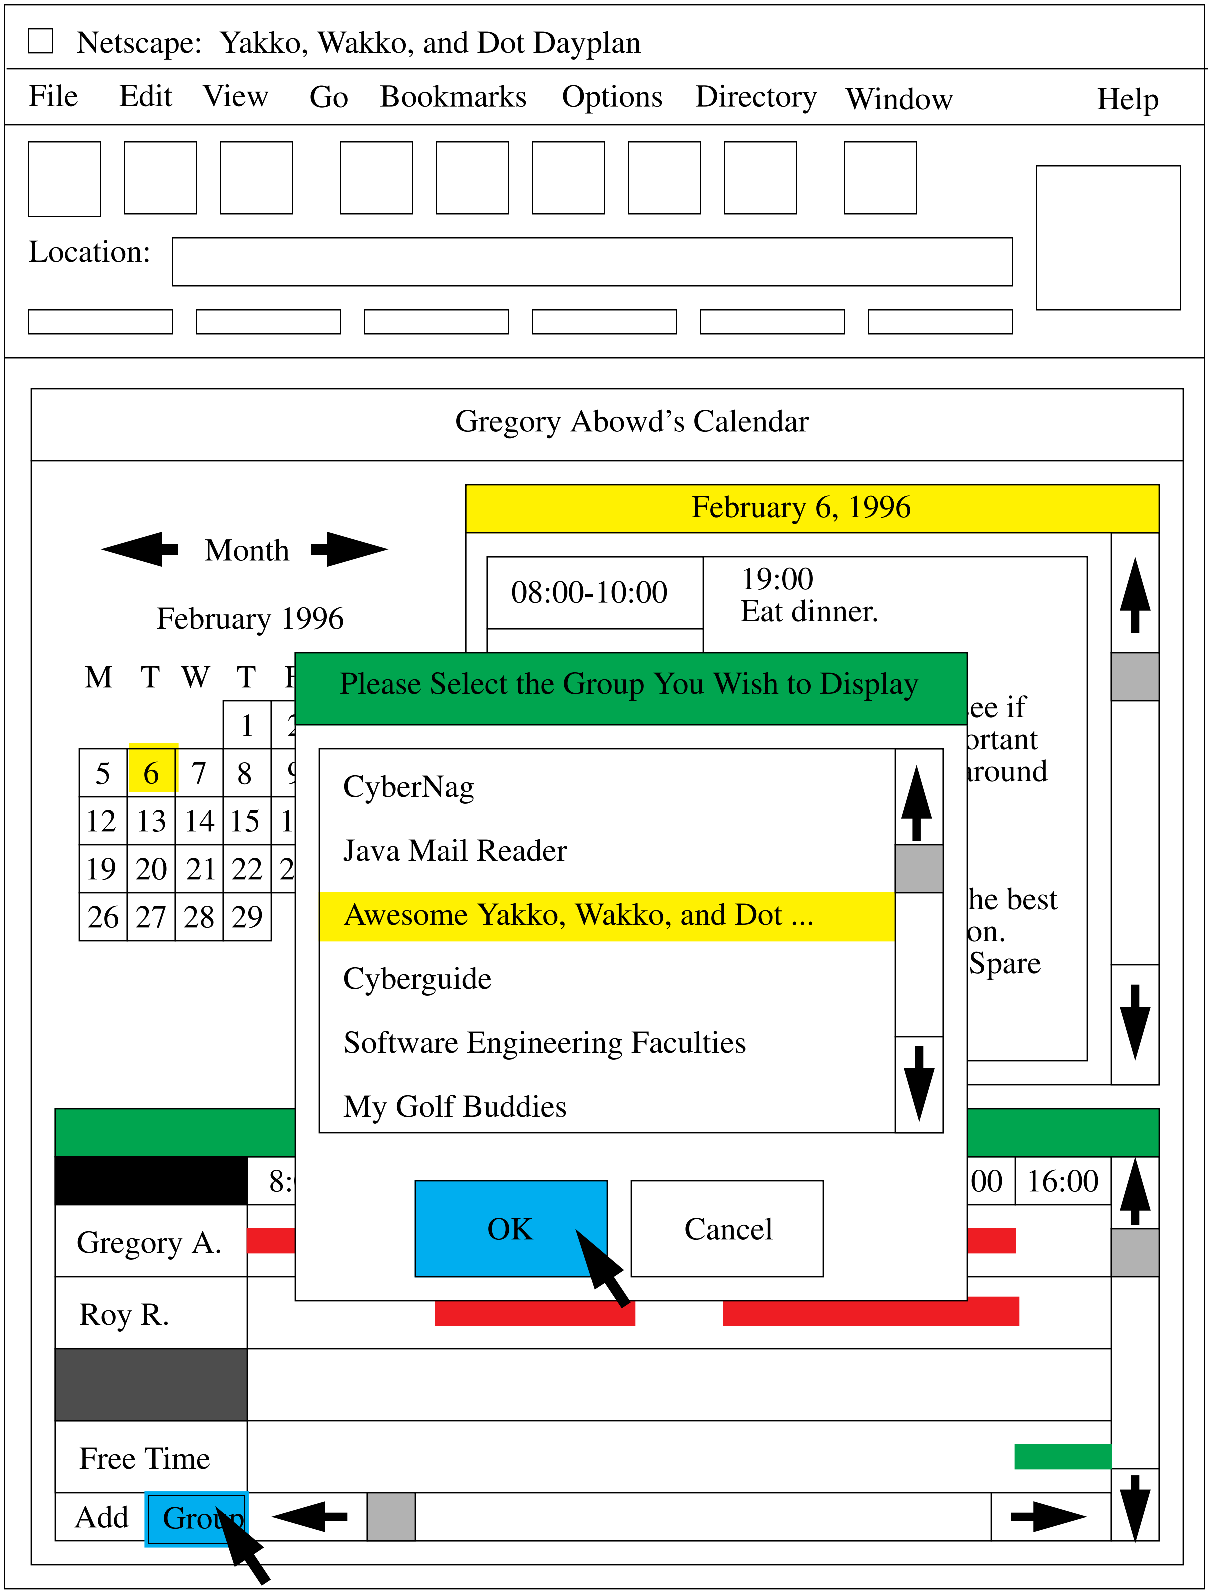


19:00
Eat dinner.

20:00
Watch news and see if there are any important event happening around the world.

22:00-22:30
Watch Seinfield, the best sitcom on television. Today's show is "Spare a Square."

8) The user also has the option to select a group of people to view the Overlay information. When the user clicks on the Group button, a window appears with an existing groups. The user simply clicks on the group and select OK, and the information will be displayed.



7) After the user specified the URL of the person to add to the Overlay display, the Free Time section will automatically update to display the free time that exists between the two schedules. The user can continue to add more people if he/she wishes.

5) Listing only the time that a person has an appointment might make it hard to see what block of time one has free; therefore, when the calendar first displays the information, the overlay information window will only display the user's schedule and block of time free. This allows the user to easily find a free slot if he/she wishes to add an appointment.
