
The Month Display of the YWD Dayplanner provides the following facilities:

- o Month Scrollbar - The month scrollbar allows the user to go to the next month or go back to the previous month.

- o Date Buttons - Each of the dates in the month are buttons which the user can press and see the appointments for that date. When the button is selected, it will be highlighted for visibility. The dates will be automatically generated for every month. Leap year will also be considered and implemented.
