The Electronic Scrapbook:
Towards an Intelligent Home-Video Editing System

by

Amy Susan Bruckman

Submitted to the Media Arts and Sciences Section, School of Architecture and Planning,
on August 9th, 1991, in partial fulfillment of the requirements
for the degree of Master of Science in Visual Studies
at the Massachusetts Institute of Technology

Abstract

How many people's home videos remain unedited and unwatched? Home video is a growing cultural phenomenon; however, few consumers have the time, equipment, and skills needed to edit their work. The Electronic Scrapbook is an environment designed to encourage people to use home video as a creative medium. The system and the user collaborate to create home-video stories.

This work addresses issues of knowledge representation and interface design. Semantic knowledge representation is evaluated as a way to represent information about complex, temporal media. A modified form of case-based reasoning, "knowledge-based templates," is used to explore what a computational model of a home-video story might be.

Thesis Supervisor: Glorianna Davenport
Title: Assistant Professor of Media Technology

This work was supported in part by Apple Computer, Inc., and by The Nichidai Fund.

Acknowledgements

I'd like to thank my advisor, Professor Glorianna Davenport, for her guidance and support.

My thesis readers, Professor Kenneth Haase and David S. Backer, Phd. provided thoughtful comments and technical expertise.

Marc Davis, Pattie Maes, Alan Ruttenberg, and Michael Travers commented on drafts of this thesis. It was Marc who first suggested using a "scrapbook" design metaphor. Marc helped to critique the system design as it evolved. Mike and Alan have been a constant source of technical support, answering many a pesky question when I was first learning lisp.

I'd like to thank all of my colleagues at the Media Lab for providing such a wonderful environment to work and play, often the same thing, especially: Edith Ackermann, Carlos Alston, Joe Chung, Stuart Cody, Eddie Elliot, Henry Lieberman, Ron MacNeil, Dave Rosenthal, and Liza Wirtz.

The narrative-intelligence reading group has provided an intellectual context for research at the Media Lab. In addition to those members already named above, I'd also like to thank Professor Henry Jenkins.

I'd like to thank Mom and Bernie for being there for me.

Finally, thanks go to all those who lent me their home videos -- Linda Haviland Conte, Marie Crowley, Chris Gant, friends of Shawn O'Donnell, Rosalind Picard, Chris Schmandt, and especially Dad, Mari, Alicia, Danielle, Rachael, Enid, Rose, Toby, and Lucy.

Contents

1. Introduction.....	9
1.1 An Electronic Scrapbook	9
1.2 A Sample Interaction.....	10
1.3 Overview of this Document.....	11
2. Background: Representation and Interface Design	13
2.1 Editing Images	13
2.2 The Search Problem	13
2.3 Computer Representations.....	14
2.4 How Much Representation is Necessary?.....	16
2.5 Interface Design and Coding.....	17
2.6 Constructionism	17
2.7 Visual Interface Design.....	18
3. A Digital Video Design.....	20
3.1 Current Hardware.....	20
3.1.1 A Digital Video Scrapbook.....	20
3.1.2 Laserdisc as a Stand-in for Digital Video	21
3.2 Software	21
4. Video Source Material	22
4.1 Choice of Material.....	22
4.2 My Family's Video.....	23
5. Interface Design and Development	28
5.1 Titled Icons.....	28
5.1.1 Combining Text and Graphics	28
5.1.2 Local Methods.....	29
5.2 Video Controller.....	29
5.2.1 Device Control.....	29
5.2.2 Paying Full Attention to the Picture.....	30
5.3 The Segment-Editor Window.....	32
5.3.1 Text Versus Graphics	32
5.3.2 Panes: Avoiding Screen Clutter.....	32
5.4 List Browsers.....	34
5.4.1 A Sample List Browser	34
5.4.2 Lists of Options: Towards Logging Consistency	34

5.4.3 Hierarchical Sorting: Visualizing the Underlying Representation	34
5.5 Video Segments	36
5.6 Scrapbook Windows	37
5.6.1 Spatial Implies Temporal Organization	37
6. A Suburban Ontology	39
6.1 People	39
6.1.1 Extending the Representation: New Buttons and Object Editors	39
6.1.2 Inferencing Capability: Family Relationships	40
6.1.3 The Need for a Graphical Interface	41
6.1.4 But What Can All of This Information Be Used For?.....	42
6.1.5 Focus Person	42
6.2 People in Audio Only	43
6.2.1 The Need for Separate Representations of Video and Audio.....	43
6.3 Locations.....	43
6.3.1 Functional rather than Geographic Information	43
6.3.2 Linking Space and Time.....	44
6.3.3 Interface Coding for a Multi-level Representation	45
6.3.4 Multiple Inheritance.....	45
6.4 Events.....	45
6.4.1 The Power of the “Event” Abstraction.....	47
6.5 Actions	47
6.5.1 Emotional Actions.....	48
6.5.2 Complex Information.....	48
6.6 Significant Objects.....	49
6.6.1 How Much Representation is Necessary?.....	50
6.7 Segment Date.....	50
6.7.1 Qualitative Reasoning.....	50
6.8 Camera Properties.....	51
6.8.1 Video Quality.....	52
6.8.2 Stylistic Constraints.....	52
6.9 Subjective Properties.....	53
6.9.1 Lack of Perspective on the Subject Matter.....	54
6.9.2 Sensitive Subject Matter.....	54
7. Guessing.....	55
7.1 Level of Detail.....	55
7.2 Inheritance	56
7.2.1 Event-based Inheritance.....	56
7.3 Making Inferences Apparent.....	56
7.4 Similar Segments.....	58
7.4.1 The Score Function	58
7.4.2 Selecting Similar Segments.....	60

8. Story Models	61
8.1 Database Searches.....	61
8.1.1 Checking the Knowledge Hierarchy.....	61
8.1.2 Searching for People.....	62
8.2 Simple Story Models.....	62
8.2.1 The Basic Search.....	62
8.2.2 Discards	63
8.2.3 Filtering.....	64
8.2.4 Removing Overlapping Segments	65
8.2.5 Sorting.....	66
8.2.6 One Last Pass: the After-sort Function.....	67
8.3 Compound Story Models.....	68
8.4 Results of a Simple Story Model: child-at-age.....	68
8.5 Comparison of Two Approaches: kids-at-same-age and important-firsts	70
9. Related Work.....	72
9.1 Case-Based Reasoning.....	72
9.2 Text-Based Story Generation.....	73
9.2.1 Manipulating a Limited Vocabulary	73
9.2.2 Goals	73
9.3 Scripts	74
9.4 The Cyc Project	74
10. Future Work.....	75
10.1 More Data	75
10.1.1 Birthday Parties	75
10.1.2 Scaling	75
10.1.3 Storage, Memory, and Speed Issues.....	75
10.2 Digital Video.....	76
10.2.1 Still Frames to Represent Segments.....	76
10.2.2 A Linear Representation of the Source Material.....	77
10.3 An Interface to Story-Models	77
10.4 A Graphical Interface to the Underlying Knowledge Representation	78
10.5 Making the Interface Reconfigurable	79
10.6 Annotations.....	79
10.6.1 Titles	79
10.6.2 Histories.....	80
10.6.3 Why	80
10.7 Scrapbook Page Types.....	80
10.8 Object Permanence	81
10.8.1 Instances.....	81
10.8.2 Temporal Extents.....	82

11. Conclusion	83
11.1 Interface Design.....	83
11.2 The Benefits of Knowledge Representation	84
11.2.1 Multiple Models.....	84
11.2.2 The Need for a Common Language	84
Bibliography.....	86
