**Information
Interfaces**

Information Overload

- Large amounts of data available
 - Public information
 - News
 - Weather
 - Traffic
 - Sports scores
 - Personal information
 - Financial information
 - E-mails
 - Family photos

Peripheral Awareness Information

- Desire to maintain a level of awareness
- Will vary from person to person
- Difficult to maintain awareness
 - Have to remember
 - Requires explicit action

Informal Study

- 25 participants
- 80% check news or finance sites
- Most check at least once or twice a day
- Most had habitual browsing
- Great diversity in actual sites
- Many used “start pages” like MyYahoo!

Dealing with Overload

- Personalized Portals
 - + Quick to configure
 - Limited information & representation
 - Requires explicit interaction
- Windows Active Desktop
 - + Allows for any web page
 - Difficult to configure
 - Explicitly have to minimize all windows

Dealing with Overload

- Second Monitor
 - + Highly customizable
 - Still subject to information overload
- Ambient Displays
 - + Abstract and integrated into environment
 - Limited bandwidth

Design Principles

- Available – Minimal user interaction
- Consolidated – Integrated view of data
- Peripheral – Calm and undemanding
- Personalized – Highly customizable
- Secure – Obscure personal data

The InfoCanvas

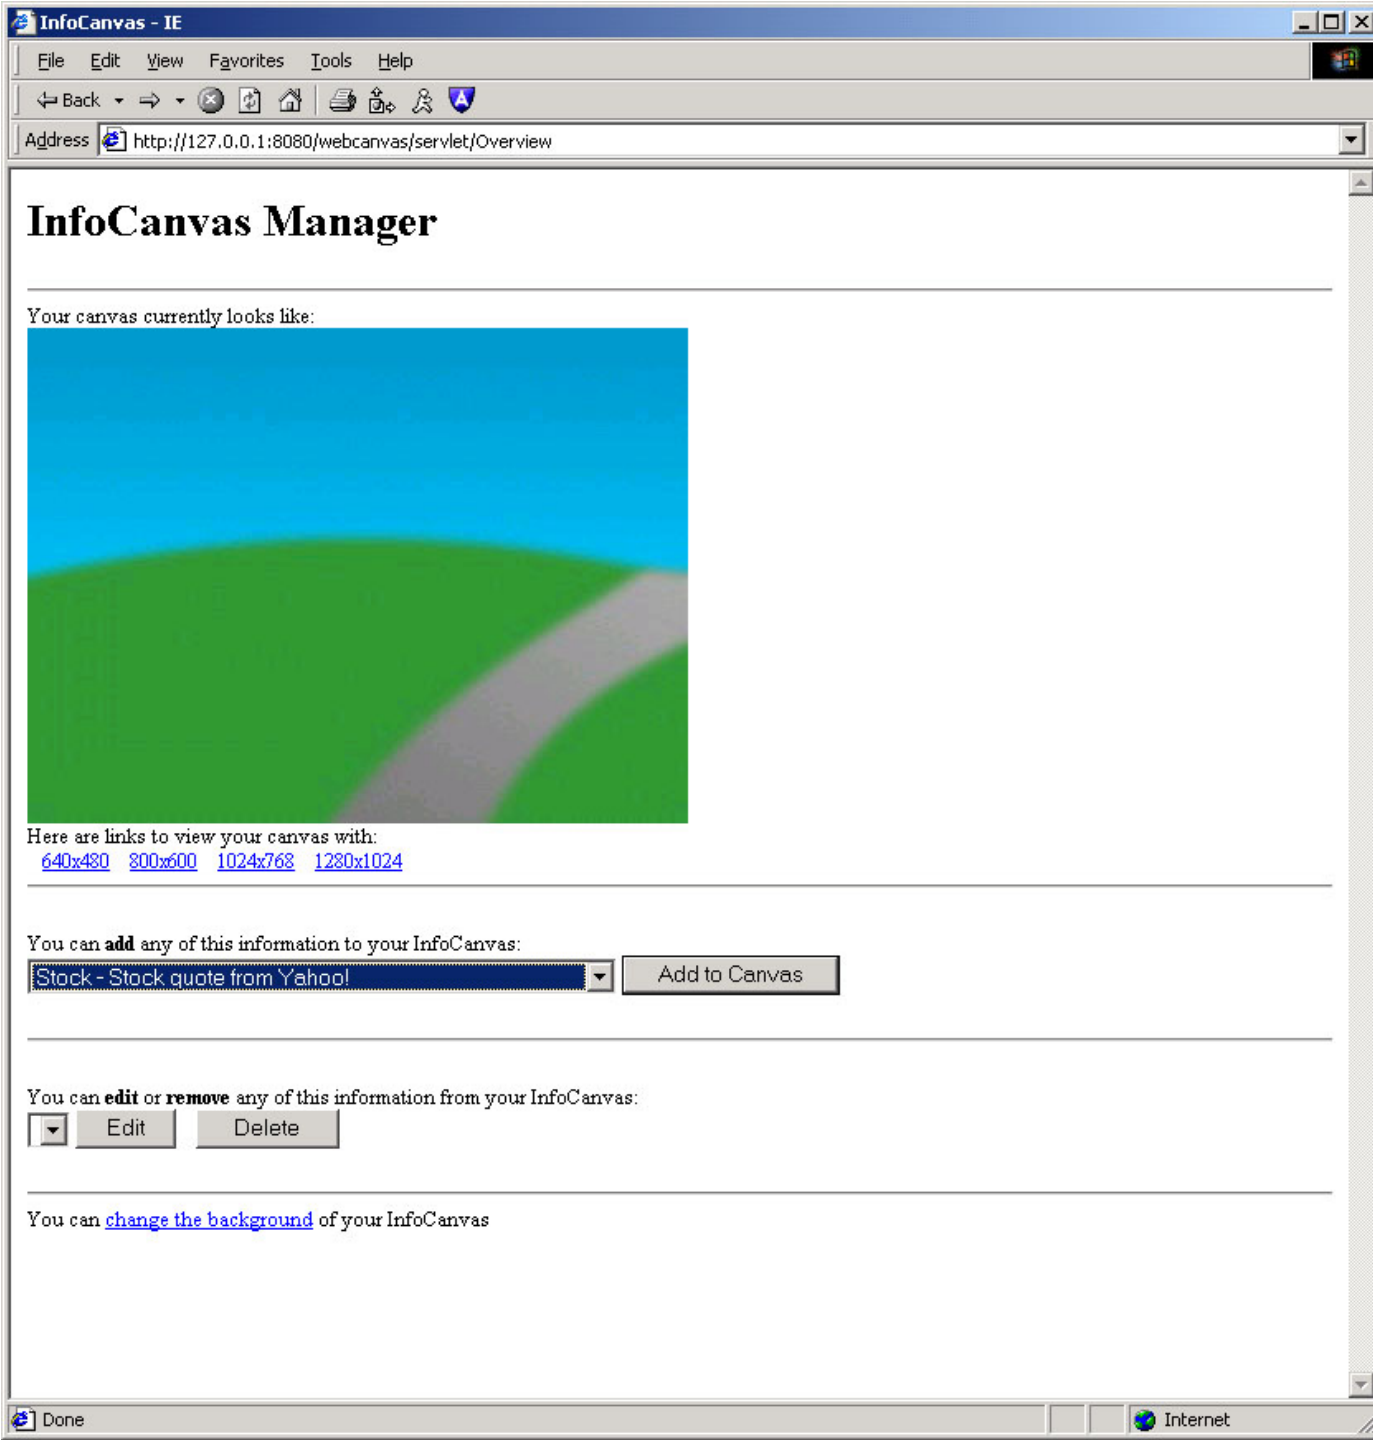

- Information Artwork
- An ambient LCD display
 - Like picture on desk or hung on wall
- Presents an eye-pleasing picture
- Elements of picture represent data and subtly change
- Allow the user to define both the information and its representation

A Quick Tour

- Early prototype of InfoCanvas
 - Restricts data and visualization
 - Written as Java Servlets
 - Completely accessible over the web

Information Details

You are adding "Stock price quote for MSFT" to your canvas. Here is the information you supplied about this data:

symbol: **MSFT**

Representation

Please choose from the images on the right that you want to associate with this representation:

show  Change to

When the value of **percent** equals **0.0**,

show  Change to

When the value of **percent** is greater than **0.0** and lesser than **5.0**,

show  Change to

When the value of **percent** is greater than or equal to **5.0** and lesser than **10.0**,

show  Change to

When the value of **percent** is greater than or equal to **10.0**,

show  Change to

When the value of **percent** is greater than **-5.0** and lesser than **0.0**,

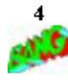

show  Change to

When the value of **percent** is greater than **-10.0** and lesser than or equal to **-5.0**,

show  Change to

When the value of **percent** is lesser than or equal to **-10.0**,

ze

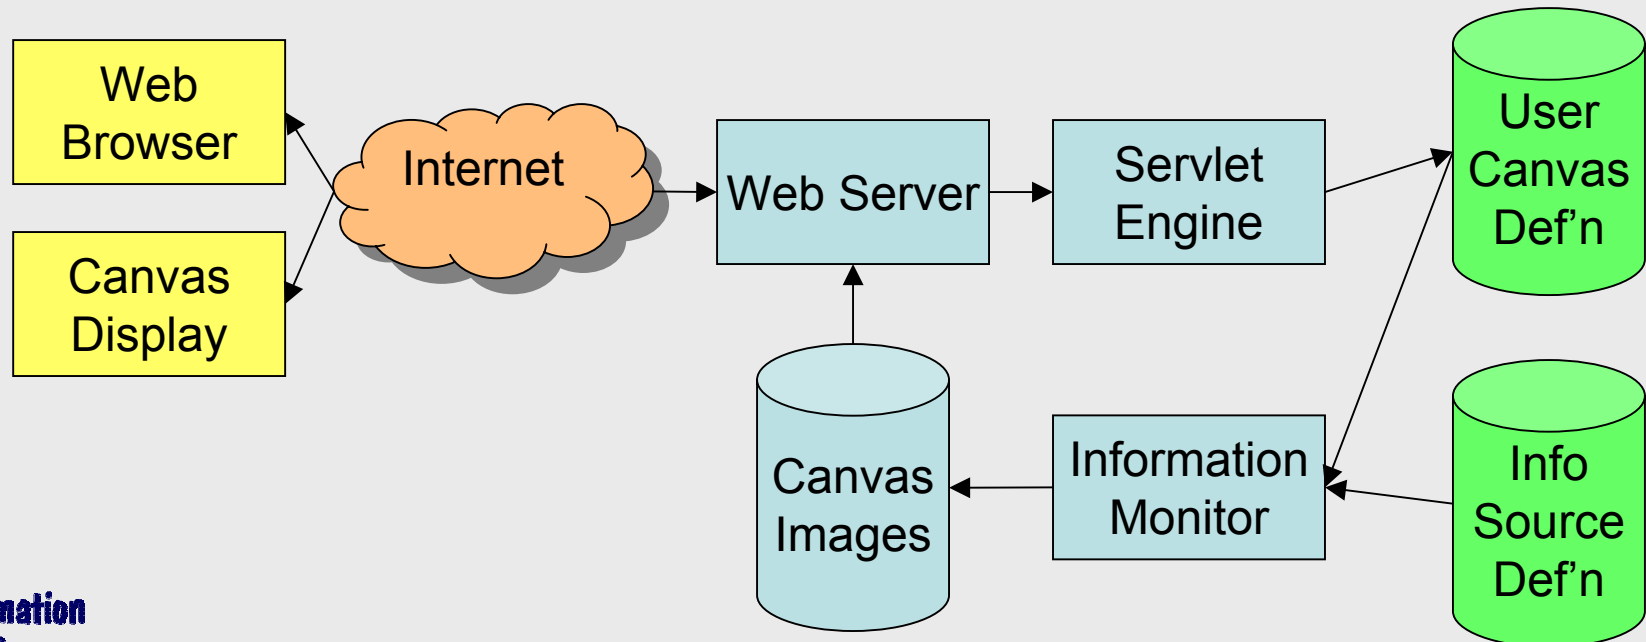

Behind the Scenes

- General Architecture
 - Monitoring information
 - XML definitions of sources & user canvases

Advanced Users

- XML permits high degree of customization
 - Both canvas and sources
- Bypass web interface by FTP'ing

```
<canvas name="AVI Canvas" password="12345">
<background src="basic_background.gif"/>
<source class="WebSource" def="stockquote.xml">
  <base x="0.8075" y="0.21"/>
  <scale percent="1.0"/>
  <param name="symbol" value="MSFT"/>
  <oparam name="price" value="0.0"/>
  <oparam name="percent" value="0.0"/>
  <rule class="ValueCompare">
    <param name="paramName" value="percent"/>
    <param name="et" value="0.0"/>
    <rep class="ShowImage">
      <param name="imageFilename" value="clear.gif"/>
      <param name="x" value="0.0"/>
      <param name="y" value="0.0"/>
    </rep>
  </rule>
</source>
</rule class="ValueCompare">
```

Satisfying the Design Principles

- Available – 2nd display requires no interaction for user to use
- Consolidated – Allows a large amount of information to be portrayed in one space
- Peripheral – Subtly updates display
- Personalized – User defines data & display
- Secure – Abstractness protects privacy

InfoCanvas of the Future

- Any type of electronic information
- Information painting tool
 - Importing & drawing info representations
 - Point and click data capture
 - Still a need for pre-defined
 - Similar to PLAY's InformativeArt

Conclusions & Future Work

- Peripheral information is important
- InfoCanvas provides a novel way of representing peripheral information
- Moving towards an “information painting” tool
