

## Intel Opportunity Scholar's Program

The College of Computing, the School of Computer Engineering, and the Intel Corporation present the Georgia Tech - Intel Opportunity Scholar's Program.

The goal of the Program is to support and encourage the academic success, retention, and ultimate graduation rates of underrepresented students in computer science and computer engineering.

IOS began during the spring of 2003. Today, the program relies on the support of 18 Ph.D. students who serve as research and academic mentors to more than 50 scholars.
