Audio Welcome

What is IRIS Showcase?

† Integrated drawing and presentation program

† Create documents with
  – 2D drawings
  – images
  – text
  – 3D models
  – audio
  – video
  – on–screen slide shows

Presentation Paradigm

† Everything in the document is an *object*

† Objects can be manipulated
– move, stack, resize, rotate, copy, etc.

† Objects can be edited

† Tools used are called *gizmos*
– Master
– 3D
– Align
– Audio
– HyperScript
– Image
– Page
– Status
– Template
– Text
– Video

Running IRIS Showcase

† Type *showcase* at the shell prompt

OR

† Double–click the Showcase icon in the WorkSpace 

† Showcase starts up with
– document
– Master gizmo
– Status gizmo

Documentation

- IRIS Showcase User's Guide available through IRIS InSight
  - make sure remote display is set–up properly
    1) on local machine, type *xhost +sgi4*
    2) *rlogin* to sgi4.gvu
    3) set DISPLAY to *[local_machine]:0.0*
  - access InSight by typing *insight* on sgi4.gvu
- On–line help available through *Help* menu in Showcase

Helpful Hints

† Two edit modes for objects

single–click → se*lected*

– move, resize, change attributes

double–click → *editable*

– edit text or graphics

† Start showcase with the –*v* or –*s* option to view interactive presentation or slide show

† To insert clipart

1) Open a new document for the desired clipart (provided in *usr/lib/showcase/clipart*)

2) Copy the object

3) Re–open your existing document

4) Paste the object into your existing document
